Nickel based high basic SMAW welding electrode. (Type Alloy 690)

CEWELD E NiCro 690 electrodes are used for welding of nickel-chromium-iron Inconel alloys 690 to themselves and 600 steels. Also for heterogeneous stainless and low-alloy steels. Soft arc, easily detachable slag, regular beads. Nuclear power plants, chemical industry.

CEWELD E NiCro 690 has a higher Cr content which improves resistance to stress-corrosion cracking in the nuclear, pure water enviroment.
